Curriculum Vitae

April 2026

Academic Career

- | | |
|-------------------------|--|
| 01.01.2024 – ongoing | ■ Postdoctoral Researcher & Marie Skłodowska-Curie Actions Fellow (from 01.07.2025)
Technische Universität Dresden, Germany
Host: Prof. Thomas Heine |
| 01.05.2019 – 31.12.2023 | ■ Postdoctoral researcher , École Polytechnique Fédérale de Lausanne (EPFL), Lausanne, Switzerland
Supervisor: Prof. Clémence Corminboeuf |
| 26.09.2018 – 30.04.2019 | ■ Research associate , Jawaharlal Nehru Centre for Advanced Scientific Research (JNCASR), Bangalore, India
Supervisor: Prof. Swapan K. Pati |
| 01.08.2013 – 27.03.2019 | ■ PhD in computational chemistry , Jawaharlal Nehru Centre for Advanced Scientific Research (JNCASR), Bangalore, India
(Formal award date: 09.05.2019)
CGPA: 7.75/8.0
Thesis title: <i>Computational studies on the mechanisms of hydrogen activation and catalytic hydrogenation by cooperative Lewis pairs</i>
Supervisor: Prof. Swapan K. Pati |
| June 2011 – June 2013 | ■ M.Sc in chemistry , Jadavpur University, Kolkata, India
Specialization: Physical chemistry
Rank: 1st; Score: 84.8% |
| June 2008 – June 2011 | ■ B.Sc in chemistry , Jadavpur University, Kolkata, India
Minors: Physics, Mathematics
Rank: 1st; Score: 82.9% |

Work Experience

Postdoctoral Researcher, TU Dresden

- Developing automated discovery pipelines for functional porous materials

Postdoctoral researcher, EPFL

- Development of predictive models, high-throughput screening workflows, and inverse design pipelines for accelerating catalyst discovery (lead researcher in the EPFL-GAZNAT research program on the development of metal-organic framework catalysts) and application of these tools for industrially relevant chemical transformations
- Development of statistical models for rapid prediction of catalytic properties
- Construction of machine learning potential for simulating chemical reactivity in condensed phase

Research associate, JNCASR

- Computational mechanistic investigation of main group-catalyzed reactions

Research Interests

Computational and data science techniques

- Molecular modeling, quantum chemical computations in the ground and excited states, (time-dependent) density functional theory
- Scaling relationships and volcano plots, activation-strain and energy decomposition analysis, conformational analysis, microkinetic modeling
- Supervised and unsupervised machine learning, machine learning interatomic potentials
- Virtual high-throughput screening and inverse design workflows, genetic optimization pipelines

Catalysis, separation, energy conversion and storage, chemical reactivity, and photochemistry

- Frustrated Lewis pairs, transition metal and main-group catalysis, metal-organic frameworks, 2D materials, low-valent main-group organometallic complexes
- Hydrogenation, CO₂ reduction, water splitting, C-H activation
- Nuclear quantum effects, hydrogen and helium isotope separation
- Phosphorescence, thermally activated delayed fluorescence in organic emitters.

Publications

Summary: Peer-reviewed: 40, 12 × 1st author, 12 × 2nd author, In preparation: 2

Breakdown: 3 *J. Am. Chem. Soc.*, 1 *Nat. Commun.*, 4 *Angew. Chem. Int. Ed.*, 1 *Nat. Protoc.*, 1 *ACS Catal.*, 2 *Chem. Sci.*, 1 *J. Chem. Theory Comput.*, 1 *Nucleic Acids Res.*, 2 *Cat. Sci. Awards and Achievements

- | | |
|------|---|
| 2025 | Independent fellowship awarded by Horizon Europe Marie Skłodowska-Curie Actions |
| 2017 | 1. Wiley JCC/IJQC award at Asia-Pacific conference in theoretical and computational chemistry (APCTCC8), Mumbai, India |

	2. Best poster award in International Institute for Complex Adaptive Matter (I2CAM)-JNCASR school on clean and renewable energy technologies via chemical routes, Bangalore, India
	3. International Travel Grant ($\approx$ 116000 INR) awarded by Science and Engineering Research Board, India, to attend 11th Triennial Congress of the World Association of Theoretical and Computational Chemists (WATOC), Munich, Germany
2016	1. Best poster award in JNCASR Annual In-House Symposium, Bangalore, India
	2. Best poster award in "Chemistry of Materials" conference in Kerala, India
2013	1. University Gold Medal for being first rank holder at M.Sc examination in Chemistry, Jadavpur University
	2. Prof. M. N. Das Medal for standing first in physical chemistry section at M.Sc examination in Chemistry, Jadavpur University
2013-2018	Joint five years research fellowship (for PhD) and lifetime lectureship award (all India rank 33) by Council of Scientific and Industrial Research (CSIR), India ($\approx$ 1872000 INR)
2013	All India Rank 07 in Graduate Aptitude Test Engineering (GATE) in Chemistry
2011	University Gold Medal for being first rank holder at B.Sc examination in Chemistry, Jadavpur University
2010	Indu Bhusan and Shanti Sudha Putatunda Memorial Award , Jadavpur University (awarded to the first rank holder in the B.Sc 1st year examination)
2008	Five years INSPIRE scholarship ($\approx$ 300000 INR) awarded by Department of Science and Technology, India (awarded to top 1% students for funding the B.Sc and M.Sc in basic and natural sciences)

Funding

- **Marie Skłodowska-Curie Actions Postdoctoral Fellowship** | Duration: July 2025 – June 2027 | Amount: 217,965 Euro
Project title: Inverse design of metal-organic framework catalysts
- **NHR-normal project for HPC time (30M CPUh), Paderborn Center for Parallel Computing.** | Role: Co-PI | Duration: 03.02.2025 - present
Project title: Electronic structures and applications of low-dimensional and nanoporous materials

Invited Presentations

- Invited talk, FM4B 2026 (January 2026), JNCASR, Bangalore, India
- Research seminar, Tata Institute of Fundamental Research, Mumbai, India (July 2025)
- Invited communication, 13th Triennial Congress of the World Association of Theoretical and Computational Chemists (WATOC) 2025, Oslo, Norway (June 2025)
- Research seminar, IRTT-Q4 meeting, CRC 1415, TU Dresden, Germany (June 2025)
- Research seminar, Center for Advanced Systems Understanding (CASUS), HZDR, Görlitz, Germany (June 2025)
- Research seminar, University of Birmingham, Birmingham, UK (March 2025)
- Research seminar, Trinity College Dublin, Dublin, Ireland (September 2024)
- Research seminar, University of Birmingham, Birmingham, UK (June 2023)

Contributed Conference Talks

- COPS XII: 12th International Symposium on the Characterization of Porous Solids, Dresden, Germany (May 2026)
- SusML: Towards sustainable exploration of chemical spaces with machine learning, MPI PKS, Dresden, Germany (September 2025)
- European Materials Society Fall Meeting, Symposium C, Warsaw, Poland (September 2025)
- European Materials Society Fall Meeting, Symposium E, Warsaw, Poland (September 2025)
- American Chemical Society (ACS) Fall Meeting, Virtual (August 2023)
- 15th European Congress on Catalysis (EUROPACAT), Prague, Czech Republic (August 2023)
- Swiss Chemical Society (SCS) Fall Meeting, Zurich, Switzerland (September 2022)

Poster Presentations

- Symposium of Theoretical Chemistry, Berlin, Germany (September 2025)
- Chemical Compound Space Conference, Heidelberg, Germany (May 2024)
- NCCR Catalysis Annual Review Meeting, Bern, Switzerland (September 2023)- invited
- 12th Triennial Congress of the World Association of Theoretical and Computational Chemists (WATOC), Vancouver, Canada (July 2022)
- Swiss Chemical Society (SCS) Fall Meeting, Zurich, Switzerland (September 2019)
- Asia-Pacific Conference of Theoretical and Computational Chemistry (APCTCC8), Mumbai, India (December 2017)
- International Institute of Complex Adaptive Matter (I2CAM)-JNCASR school on Clean and Renewable Energy Technologies via Chemical Routes, Bangalore, India (November 2017)
- 11th Triennial Congress of the World Association of Theoretical and Computational Chemists (WATOC), Munich, Germany (August 2017)
- Recent Advances in Many Electron Theory, Goa, India (February 2017)
- JNCASR Annual In-House Symposium, Bangalore, India (November 2016)
- Theoretical Chemistry Symposium, Hyderabad, India (December 2016)
- Chemistry and Physics of Materials, Kerala, India (October 2015)
- Theoretical Chemistry Symposium, Pune, India (December 2014)

Schools and Workshops

- Summer school on materials simulation theory and numerics, MASTANI, Pune, India (July 2014)
- NCCR MARVEL workshop with Marianne Schmid Mast. "Beyond Bias: Diversity and Team Work", EPFL, Switzerland (October 2019)
- Summer school on big data and machine learning for chemistry, EPFL, Switzerland (June 2021)

Skills

Languages	English Fluent, Bengali Native, Hindi Intermediate, German Basic.
Coding/Scripting	Python, Fortran 90, Bash, $\text{\LaTeX}$

Software	Quantum chemistry and electronic structure codes with and without periodic boundary conditions (Gaussian, PSI4, ADF, ORCA, CP2K, Quantum Espresso, xTB), RDKit, DeepMD, scikit-learn
Visualization and plotting	VMD, Molden, Chemcraft, Jmol, PyMOL, Matplotlib, gnuplot, Xmgrace

Teaching Experience

2014 – 2016	Teaching assistant, quantum mechanics course, JNCASR (mandatory for Masters students and optional for PhD students). Course duration: One semester (August to December), 2 X 2 hrs every week. Number of Students: on an average 15 each year. Role: substitute lectures; designing course materials, assignments, and exams; problem-solving.
2015 – 2017	Teacher in computational materials science lab, JNCASR (mandatory for Masters students and optional for PhD students) Course duration: total 12 hours (4 X 3 hrs). Number of Students: 10-12 each year. Role: lectures on the theory and foundation of Hartree-Fock and density functional theory calculations followed by hands-on sessions.
2024 – present	Teacher in the Theoretical Chemistry Computer Lab PC6, TU Dresden (Bachelor's degree in Chemistry, 3rd year) Course duration: total 24 hours (4 X 6 hrs). Number of Students: 22-26 each year Role: Conducting hands-on sessions on various computational chemistry (geometry optimization, spectroscopy, thermochemistry) and data analysis (Python) tasks.
2026	Teacher in the Advanced Theoretical Chemistry M08, TU Dresden (Master's degree) Duration: to be decided. Role: Lectures on machine learning (ML) in quantum chemistry covering molecular descriptors and representations, supervised and unsupervised ML, and prediction of quantum mechanical properties.

Outreach Activities

2014 – 2017	Regular participation in the “Student Buddy” program in JNCASR to motivate and guide school students from underrepresented backgrounds and underdeveloped rural areas in Karnataka, India.
2017	Tutor of special topics (chemical kinetics) in the “Student Mentoring Program” in JNCASR to prepare school students for competitive national-level examinations.
2024 - present	Scientific demonstration (cocktail-making robot) in the Dresden Long Night of Science, TU Dresden
2024-2025	Event Manager at Pint of Science, Dresden

Reviewing Experience

2020 – ongoing Regular reviewer for ACS, RSc, Wiley, Elsevier journals(*Accounts of Chemical Research*, *Catalysis Science and Technology*, *Advanced Theory and Simulations*, *Journal of Chemical Theory and Computation*, *ACS Applied Energy Materials*, *Catalysis Letters*, *Journal of Environmental Chemical Engineering*, *Journal of Chemical Sciences*)

Research Mentoring

2017 – 2022 *Pallavi Sarkar*, PhD student in Pati group, JNCASR
Current: Postdoc at Technion – Israel Institute of Technology, Israel

2018 – 2019 *Neha Bothra*, PhD student in Pati group, JNCASR
Current: Postdoc at UCF, USA

Bidhan Chandra Garain, PhD student in Pati group, JNCASR
Current: Postdoc at UCL, UK

2021 *Bruna Sanchez-Pladevall*, visiting PhD student in Corminboeuf group, EPFL from Maseras group at ICIQ, Spain
Current: Associate at McKinsey & Company

Hanna H. Cramer, visiting PhD student in Corminboeuf group, EPFL from Leitner group in MPI-CEC, Germany
Current: Postdoc at Princeton University

Thanapat Worakul, project student in Corminboeuf group, EPFL from Mahidol University, Thailand
Current: PhD student at EPFL

2022 – 2023 *Julliette Schleicher*, PhD student in Corminboeuf group, EPFL

2024 – present *Elvira Dongmo*, PhD student in Heine Group, TU Dresden

Academy Membership

2019 – 2023 Member of the Swiss Chemical Society (SCS)

2025 – present Member of the European Materials Research Society (EMRS)

Collaborators

- Prof. Jan Weigand, TU Dresden, Germany
- Prof. Stefan Kaskel, TU Dresden, Germany
- Prof. Walter Leitner, MPI-CEC, Germany
- Dr. Christophe Werlé, MPI-CEC, Germany
- Prof. Paul Dyson, EPFL, Switzerland
- Prof. Raffaella Buonsanti, EPFL, Switzerland
- Dr. Mercedes Alonso, VUB, Belgium
- Prof. Shabana Khan, IISER Pune, India
- Prof. Anukul Jana, TIFR Hyderabad, India
- Prof. Jiten K Bera, IIT Kanpur, India
- Prof. Sukhendu Mandal, IISER-TVM, India
- Prof. Subi George, JNCASR, India

- Prof. Tapas K. Maji, JNCASR, India
- Prof. T Govindraju, JNCASR, India
